## SUMMARY

---

Driven Junior Web Developer with five years of coding experience. Proficient at HTML, CSS, and JavaScript and looking to expand knowledge of web development practices and web design to use every day.

## EXPERIENCE

---

May 2017 – August 2017

**Intern Test Engineer**, GatesAir, Quincy, IL

- Completed creating a test to assure the company uses quality radio transmitting boards ahead of schedule.
- Made accompanying instruction list and diagrams in order to properly teach new users on how to test the boards correctly using Microsoft Word and Visio.
- Used the coding language Visual Basic to archive tested data and save it in an organized file for the user, as well as create a GUI for the test.

May 2014 – June 2014

**Volunteer Teaching Assistant**, Highland High School, Lewistown, MO

- Assisted a second grade class with homework or problem solving exercises whenever needed.
- Supervised students in common areas such as cafeteria, library and playground.
- Read to/with individual students, printed copies, delivered documents, etc., at the instructor's request.
